INNOVATION & GROWTH

OUR KEY CUSTOMERS

REI

Remote Equipment Interface

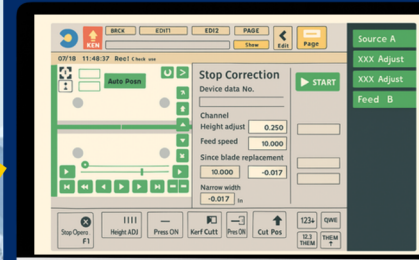

Advanced solution for managing industrial equipment remotely.

It integrates easily with existing systems, provides detailed data logging, improves efficiency and reduces maintenance costs.

RPA.Ai

Robotic Process Automation + Ai

WAFER SAW MACHINE AI AUTO ERROR RECOVERY

Our Ai-driven system intelligently monitors the wafer saw machine, automatically detecting errors in real time.

It is designed to distinguish between kerf check alarm such as below :-

A0531	Not found macro target	K0044	Kerf check : Target not found
K0038	Kerf check : Not found	K0040	Kerf check : Too wide
A0532	Not found micro target	K0045	Kerf check : Target position error
K0039	Kerf check : Off center	A0534	Not found index check target
K0041	Kerf check : Too narrow	K0046	Kerf check : Too wide (Center too wide)
K0047		Kerf check : Too wide (Include check too wide)	

OOE

Overall Operator Efficiency

Real time performance monitoring solution designed to measure, track and improve operator productivity across manufacturing and industrial operations.

ANDON WATCH

Instant error alerts are sent directly to the ANDON watch for quick response to reduce machine's downtime.
